

These pricing options represent common SCADA scenarios. Choose your own licenses and features on the next page.

Multi-Server Discounts - To help you benefit from best-in-class redundancy and synchronization, our multi-server options are highly discounted.

Single-Server Discount - Since even small systems need remote access and alarm notification, our fully loaded single server option is discounted at 5%.

		Multi-Server Options for High-Uptime Systems			Single-Server Systems
		Triple Server Premium	Dual Server Premium	Dual Server	Single Server
		For operations & configuration. Auto failover & sync across 3 sites . Unlimited remote users. Redundant Alarm Notifications. 1 year of 24/7 Emergency Support. Training Credit.	For operations & configuration. Auto failover & sync across 2 sites . Unlimited remote users. Redundant Alarm Notifications. 1 year of 24/7 Emergency Support. Training Credit.	For operations & configuration. Auto failover & sync across 2 sites . 5 remote users. Redundant Alarm Notifications. 1 year of SupportPlus.	A complete operator workstation with development. 2 remote users. Alarm Notifications. 1 year of SupportPlus.

Prices in effect as of July 1, 2025. Subject to change without notice. Training credit is only available as long as the bundle remains current in SupportPlus.

* See a full list of the communication drivers included in every license: [VTScada.com/drivers](https://www.vtscada.com/drivers)

Use these 3 steps to determine the cost of each license. Note, this price will include key features that others require you to license separately like historians, dialers, graphic libraries, Internet servers, telemetry drivers, and reports. Keep these additional costs in mind when comparing other products to VTScada.

US Pricing Build Your Own License

Choose only what you need.	Step 1: Select I/O tag limit for the base VTScada license.	Step 2: Add features to each server. If adding features to more than one server, see the discounted multi-server options on previous page.			Step 3: Add Thin Clients. (Ex. Six Clients = Single + 5-Pack.)		
I/O Tags	Runtime & Full Historian HMI, Enterprise Historian, I/O Server, Alarms Management, Synchronization Service, Version Control	+ Development Idea Studio (via server or Thin Client), Tag Management, Third-Party Data	+ Alarm Notification Email, SMS, Voice, VoIP	+ Third-Party Data Excel Plugin, ODBC, OPC, WEB Services. Only needed if Development is not added.	+ Thin Clients Concurrent PC and Mobile Connections. Shared across redundant servers.
