

## Trihedral

### A different kind of software, a different kind of company

In 1986, Glenn Wadden founded Trihedral® with three goals:

1. Create a better class of monitoring and control software
2. Treat customers with respect
3. Make a fair profit

Wadden assembled a team of skilled programmers and engineers with diverse backgrounds in process management and systems integration, then provided them a flexible work environment that encouraged creativity and rewarded initiative. The result was VTScada®, an all-in-one highly-customizable HMI package for a wide variety of industries. Later, VTScada grew to include a toolset designed for telemetry applications such as those commonly found in the power or water and wastewater industries.

#### A Commitment to Service

Twenty-nine years later, Trihedral has grown to forty people in Canada, the US, and Scotland supporting customers on six continents. Trihedral has attracted and maintained a skilled team of professionals by providing a supportive work environment and competitive salaries and benefits. High morale and low employee turnover allow Trihedral to provide unparalleled support to its customers. "Since the beginning," says Wadden, "we have built our business by providing the kind of personal support that people don't think exists any more. That gets around." Testimonials: [www.trihedral.com/testimonials](http://www.trihedral.com/testimonials)

#### Engineering Services

Trihedral also provides specialized engineering consulting services in the field of industrial control.

#### Industries of Focus

Water/Wastewater  
 Power Generation  
 Oil and Gas  
 Manufacturing

Chemical Manufacturing and Distribution  
 Air Traffic Control and Airports  
 Power Transmission and Distribution

Tank Farm Monitoring  
 Broadcast  
 Manufacturing Utility Services

#### Four Offices in Three Countries

Bedford, Canada  
*Headquarters*

Aberdeen, Scotland

Orlando, USA

Calgary, Canada
